

Career Paths

What are career paths?

- Career paths are small groups of occupations with a career cluster. Occupations within a path share common skills, knowledge and interests.

Career Paths

Below are the 6 career paths that we are going to learn about during your Sophomore year!

- Arts and Communication
- Business, Management & Technology
- Health Services
- Human Services
- Industrial & Engineering Technology
- Natural Resources Agriculture

Arts and Communication

The Creative Path

This cluster offers two different avenues of concentration:

- Careers in the Performing Arts or Visual Arts
- Certain Aspects of Journalism, Broadcasting Film require courses and activities that challenge students' creative talents.

Business, Management and Technology

The Business Path

This path prepares students for careers in planning, organizing, directing and evaluating business functions essential to efficient and productive business operations.

Health Services

The Health Path

This path prepares students to promote health, wellness, and diagnosis as well as treat injuries and diseases. Some of the careers involve directly working with people, while other involve research into diseases or collecting and formatting data and information.

Human Services

The Helping Path

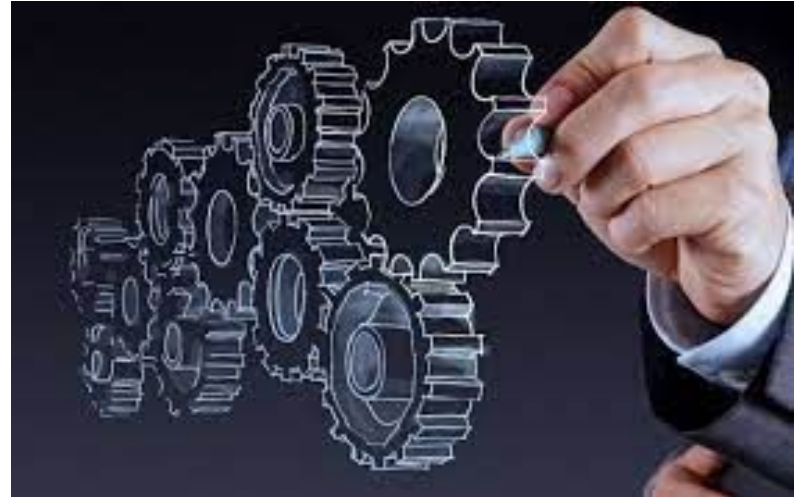

This path prepares individuals for employment in careers that relate to families and human needs such as counselor and mental health services, family and community services, personal care and consumer services.

Industrial and Engineering Technology

The Building and Fixing Path

Careers in this pathway of study are related to the technologies necessary to design, develop, install or maintain physical manufacturing systems. These may include engineering and related fields, architecture, mechanics and repairers, manufacturing technology, precision production, electronics and construction trades and related industries.

Natural Resources Agriculture

The Nature Path

Careers in this path will involve planning, managing, and performing agricultural production, horticulture and landscaping services, and related professional and technical services; planning, managing, and performing mining and extraction operations; managing and conserving natural resources; and performing related environmental services.

Things to think about:

- Do your research! Look into these career paths and see what interests you. This will help you in choosing classes for your Junior year.
- Meet with your counselor with any questions you may have!
- We will be posting a presentation each month that goes in to a more in depth description of each of these career paths.
